Cooperative Extension - Agriculture & Natural Resources

The goal of DSU Extension's Agriculture & Natural Resources Program is to help improve the economic viability of small farm enterprises across Delaware. Our program specializes in assisting small farm families through one-on-one farm visits, workshops, research, and demonstrations.

We are the Delaware resource for alternative markets such as, aquaculture, ethnic vegetables, high tunnels, meat goats, pole lima beans, *Profiting from a Few Acres* and small flock poultry. The program staff can also assist with farm and financial management issues, accessing USDA program services, direct marketing, sustainable agriculture practices and on-farm research.

Outreach programs in this mission area include:

- Aquaculture
- Farm Profitability
- Home Horticulture
- Natural Resources
- Small Flocks
- Small Ruminants

2013 Profiting From a Few Acres Conference Presentations

Alternate crops for High Tunnels **[1]**
Cape May Salt Oysters **[2]**
Community Supported Agriculture- Adding Seafood To The Recipe **[3]**
Do's and Don'ts of the Meat Goat Business **[4]**
