Department of Music

BA in Music: Music Industry Concentration

The new Bachelor of Arts in Music: Music Industry Concentration degree in the Music Department emerges out of the existing BA in Music and includes optional minors currently offered by the DSU College of Business in either Management or Marketing. In addition to the core music courses currently offered in the BA in Music, it offers students a new series of music industry courses exploring the wide range of career options currently available in the music industry. It also allows the student to focus on one of the three main sequence areas within the new music industry concentration.

- Music Recording and Technology
- Music Business, or
- Commercial Composition

Each of the three sequence areas above are distinguished by their own two-course sequence coupled with two years of Applied Music Industry lessons in the student's preferred area of specialization (recording, music business, or commercial composition).
