We will be happy to assist you in any way that we can as you make the very important decision of choosing your major field of study.

What is economics?

Economics is sometimes referred to as the queen of the social sciences. Economists are the only social scientists who are awarded the Nobel Prize each year for their contributions to the body of social science knowledge. To see the wide range of issues to which economists have applied economic principles, take a look at the contributions of [Economists who have won the Nobel Prize](#). [1]

An understanding of economics is also necessary for successfully completing studies in business disciplines such as finance, marketing and strategic management. Finally, statistical studies have shown that students who complete an undergraduate degree in economics are well prepared to enter law school. One study found that the average Law School Admissions Test (LSAT) scores of economics majors ranked first among 15 different majors. In another study, economics majors ranked third among 29 different majors.
